As you can see in [Nii16], 3D Printing is becoming more and more popular.
Auch in der Biomedizin gibt es wesentliche Fortschritte[1]. Die Industrie wächst steil an:

> The market for 3D printing, more technically called additive manufacturing (AM), grew at a compound annual growth rate (CAGR) of 35.2 percent to $4.1 billion in 2014, according to Wohlers Report 2015. *[McC15]*
